The new Business Analytics and Technology Innovation Centre at HELP's Subang 2 campus

HELP

THE ANALYTICS-DRIVEN ENTREPRENEURIAL UNIVERSITY

To prepare for the future, we are transforming to become the Analytics-Driven Entrepreneurial University. Our effort is recognised by MDEC which conferred on us the Premier Digital Tech University Award. We also received the MDEC Recognition for Certificate training in Data and Business Analytics for students.

To support this transformation, HELP invested RM25 million in the Business Analytics and Technology Innovation Centre (BATIC) which will innovate and incubate techno-entrepreneurship. At the same time, we are investing heavily in re-skilling and up-skilling staff capabilities in data science and data analytics. We are getting bigger, better, bolder in our innovative education investment.

Besides using analytics to drive our management and teaching, we are also building our research capability in analytics application. Part of the research grant from the Ministry of Education and internal funding is allocated for analytics research.

To complement the above development we have signed up with Bloomberg to set up one of the largest Bloomberg Finance Labs among private institutions in Malaysia. This resource facility boosts the economics, business, financial and analytics training in our Faculty of Business, Economics and Accounting, the ELM Graduate School and the Faculty of Computing and Digital Technology.

In addition, we have training and internship collaboration with multinational companies like Alibaba, Sheng Tai International and techno-entrepreneurs.

Internationally, HELP has earned further recognition for its innovative efforts. In the QS Star Rating System, we were awarded the maximum 5 Stars in 9 categories of endeavour, including Online Learning and Business and Management Studies; in the QS World University Ranking we were placed No. 1 in Asia for Outbound Student Exchange in recognition of our achievements in placing students in top institutions worldwide and for being a university of choice for students from many continents.

ALL HELP STUDENTS ARE ELIGIBLE FOR THE FREE CERTIFICATE IN DATA AND BUSINESS ANALYTICS COURSE

Competency in a profession), we have designed the TEA culture to nurture the right skills and predisposition in our students.

TEA is the acronym for Thinking mind, Entrepreneurial attitude, Analytics skills: T is about robust thinking skills; E is about having a problem-solving mindset; A is about the skills in applying evidence-based management using data analytics. Each of these is supported by a programme of skills training and attitude development, viz the Critical Thinking Skills Programme, the Entrepreneurship-Leadership-Management Programme (ELM), and the Analytics Certificate Programme. This is the core education culture of HELP University as we prepare our students to be IR 4.0 future ready.

During the last 33 years HELP has been exploring and experimenting with innovative ways to evolve our education philosophy, principles and practices. To achieve the 3 Cs (Character development, Competency in leadership, and

A LEVEL ABOVE THE REST

Our proven record of achievements speaks for itself.

With a total of 104 World Top Awards to date, including this year's record of six, the Malaysia Toray Science Foundation (MTSF) Science Education winners for 24 years running, and not surprisingly, being declared the "Best and Biggest Edexcel A-Level Centre in the World" in 2011 (World Conference, Hong Kong), HELP is indeed more than a centre of excellence. The long list of top achievers continues to expand, with an increasing number of annual graduates gaining both admission as well as scholarships to top universities worldwide.

So the big question to many who are interested to learn is: How do we do it every time? Is it our dedicated A-Team, the quality of our students, the facilities, or something else besides the specially built-in GTE (Getting the Edge) programme? Perhaps, but the answers are much simpler to understand.

Firstly, it is all about ambition. A-Level students are very ambitious. They want to gain admission to the best universities and to find the most rewarding careers for their future. Secondly, it is all about beliefs. These students believe nothing

can stop them from exploring for the best options. Whether they walk in after school with their 10 As, 7 As, 5 As or even much less, the A-Levels will always be one more opportunity to achieve, a one-stop preparation.

Finally, they have to make their choice between best campus, best location, or best academic results.

I congratulate all who have joined us and contributed to such an impressive record of excellence, and to the many more to come who will likely surpass their own expectations with a little help from us.

Cheers, all are welcome to HELP - always a level above the rest.

Jahn Cheah

HELP HAS COACHED A-LEVEL STUDENTS TO ENTER THE WORLD'S TOP UNIVERSITIES

Cambridge, Oxford, Imperial College London, Harvard, Yale, Princeton, Stanford, Chicago, Melbourne and the Australian National University, with many gaining both admission and scholarships either from prestigious scholarships boards or directly from the universities.

CENTRE OF EXCELLENCE

The Department of A-Levels was the first centre to be awarded the Centre of Excellence by Edexcel International UK for exceptional delivery of the London GCE A-Levels in recognition of its superior facilities, outstanding quality of teaching, excellent pastoral support and, above all, academic results (with a track record of 104 Outstanding Pearson Learner Awards).

STATE-OF-THE-ART FACILITIES

The Curie Science Labs are equipped with top quality apparatus and safety features. These labs are acclaimed to be among the best in the world by the Edexcel A-Levels Chief Examiner from the UK.

STUDENT PLACEMENT CENTRE

Dedicated staff members assist A-Level students in their application for admission to universities worldwide and in their bid to secure scholarships.

UNIQUE PASTORAL CARE

Each student is assigned to a mentor who monitors and guides him or her on academic performance and provides advice on applications for university admission. Counsellors from the Department of Psychology also provides a range of mental health and leadership programmes and personal counselling services.

THE GETTING THE EDGE (GTE) PROGRAMME

This unique programme cultivates leadership and organisational skills among students who work closely with our most experienced lecturers on award-winning science projects. Our students also participate in creative writing, drama as well as challenging yet fun mathematics workshops; and develop technological skills through multimedia workshops.

GLOBAL RECOGNITION

Recognised by the Qualifications and Curriculum Authority (QCA), UK and fully accredited by the Malaysian Qualifications Agency (MQA).

DUAL PROGRAMMES

HELP now offers a 'dual option' advantage, the first centre in the country to conduct both the Edexcel International Advanced Levels and the Cambridge Assessment International Education.

**EDEXCEL INTERNATIONAL ADVANCED LEVEL (IAL)
AND CAMBRIDGE ASSESSMENT INTERNATIONAL
EDUCATION (CAIE) : WORLDWIDE RECOGNITION**

- IAL and CAIE are top ranked examination boards
- Both operate under guidelines for quality, standards and consistency specified by the Joint Council for Qualifications (JCQ) and Cambridge Assessment of the United Kingdom
- There is no difference in the level or quality between the examinations of Edexcel and CAIE
- The specifications of syllabuses may differ but both of them are recognised by top universities, colleges and employers all around the world.

MAIN DIFFERENCE BETWEEN IAL AND CAIE

- IAL modular system allows students to retake any module to improve their subject grade without having to repeat an entire level. Only the highest mark scored in any attempt will be taken into account
- CAIE's linear system requires students to take the exam in two phases – AS level and A2 level – to make up a full A-Level pass. Each level accounts for 50% of the total mark. Students dissatisfied with any unit must re-sit the entire level. Only the last score will be taken for A2 into account. Although universities often require a number of full A-Level passes for admission, AS grades also attract UCAS points and are counted for university entrance.

MALAYSIA TORAY SCIENCE FOUNDATION

Malaysia Toray Science Foundation (MTSF) is a foundation set up to promote and advance science and technology in Malaysia through various competitions and research grants. Inspired by the noble effort of MTSF, the Department of A-Levels has introduced a workshop called MTSF Workshop with a similar aim to inspire our students to develop a greater interest in and a deeper understanding of science and technology.

A culture of creativity and innovation is encouraged in the workshop through various fun and exciting activities and projects. Apart from that, students are also encouraged to turn their novel idea into functional and effective projects with the emphasis not only on creativity but also on practicability and cost-effectiveness.

HELP lecturers, working together with their students, have won countless awards in the MTSF Science Education Awards over the years.

Left: Mr. Seow Yoke Hock with his award-winning MTSF project entitled "Electromagnetism in a Current-carrying Wire"

GETTING THE EDGE

It is a personal development programme that is offered only by the Department of A-Levels, HELP Academy.

This workshop aims to groom participants and guide them with the right skills on how to write an excellent personal statement and win an interview in order to get into World Top Universities.

GTE students are entitled to 2 hours per week added to their normal academic timetable, where they will

work with lecturers to develop their inter-personal skills such as critical thinking, public speaking, writing, analytical thinking, creative thinking, acting, etc.

It is strategically designed to consist of 4 workshops:

- **Speech, Writing and Presentation**
- **Malaysia Toray Science Foundation**
- **Current Affairs**
- **Mathematics**

CURRENT AFFAIRS

The student's life of classroom and textbook is far removed from the events that shape the real world. At this age, students need to learn to apply their critical thinking skills to the world beyond the exam hall.

To this end, a comprehensive knowledge of current affairs and an ability to critically analyze these issues enables the student to mature, distinguishing them from other candidates.

This component aims to give students a deeper understanding of how to deconstruct the factors behind the events occurring in the world. The aim of the classes is to introduce an event, look at the causes behind the event and explore the wider repercussions of the event. Knowledge of current events will also help students widen their outlook on the world.

Issues tackled in this unit include global conflicts, political, economic crises and the socio-economic impact of technological developments. The lesson plan of the class is not rigid but will adapt to where the discussion takes it.

SPEECH, WRITING AND PRESENTATION

“Confidence, like art, never comes from having all the answers; it comes from being open to questions.”
– Earl Gray Stevens

Designed in three modules, the SWP workshops coach you to come out of your comfort zone and put on your thinking cap in a collaborative learning environment.

Module 1 Effective presentation skills

You will be taught how to confidently face an audience, adopt the right body language, and the best tonal quality and eye-contact, with the aid of PowerPoint presentations. In the process, you will say goodbye to your stage fright and find your own voice and identity.

Module 2 How to write effective personal statements for college admissions

You will be encouraged to identify your strengths and weaknesses, evaluate your experiences and talents, arrange your line of thought in the most convincing manner and thus write the best personal statements.

Module 3 How best to prepare for college admission interviews

You will be taught specific skills and best practices that mould you into an effective interviewee capable of answering unexpected questions from interviewers, thus improving your chances of getting admission in your university of choice.

MATHEMATICS

GTE Mathematics workshops provide a platform for students to explore mathematics in different ways by applying mathematics in our daily lives. The aim is to thrill students with an engaging piece of mathematics and to initiate a fundamental paradigm shift in how the world perceives and enjoys mathematics.

Having the opportunity to discuss and share experiences on the strategies of application to real life problems deepens their understanding and makes mathematics more exciting. Mathematics takes on new meaning when students can collaborate with other students by sharing their ideas.

Different activities are conducted each semester to encourage creativity in mathematics, with the help of computer software, eg drawing a diagram or perhaps a

concept map or an animation with math equations. Technology is one avenue through which students can use their creativity by describing a mathematical concept with imaginative computer animation, live action, music and special effects.

GTE workshops transform and declutter mathematics content to reveal its coherence, meaning and joy where they could explore the realistic applications of math skills and concepts to the real world.

Our A-Level students are attracted to mathematics through the workshop, where sharing and discussions help Mathematics to become more understandable, exciting, and eminently worthwhile.

3D printing is a process of making three dimensional solid objects from a digital file. Students will create their own project and print the design at the end of the session.

Create a visual by graphing a series of functions. Multiple functions of different types is used to recreate a chosen picture and then graphed out.

12th National Mathematics Marathon 2019 hosted by the Department of A-Levels: Champion from SM Tsun Jin KL.

Our A-Levels straight As scorers (Cambridge)

HELP'S A-LEVELS CENTRE - YOUR CAREERS JUNCTION. ALWAYS A LEVEL ABOVE THE REST

- ▶ Recorded 104 Outstanding Pearson Learner Awards in Accounting (32), Law (15), Chemistry (13), Physics (12), Biology (8), Mathematics (11), Economics (4) Further Mathematics (8), English Literature (1)
- ▶ Malaysia Toray Science Foundation Science Education Awards for 24 years running
- ▶ 47% Straight As in one year alone
- ▶ Declared “Best & Largest A-Levels Centre in the World” (Edexcel World Conference in Hong Kong, 16 March 2011)
- ▶ Increasing list of scholarship recipients for admission to top universities in the UK, USA, Australia, Hong Kong and South Korea

Note: First year undergraduate studies structured to allow for entry by students from diverse subject backgrounds. Hence, universities have advised that it is not necessary for potential Law, Economics or Accounting and Finance students to study these subjects at A-Levels, while science students will continue to enjoy the variety of options for careers in science and the arts.

NURTURING A-LEVEL STUDENTS INTO TOP ACHIEVERS

The HELP Counselling Team comprises distinguished academics and specialists who nurture students to become all-round achievers, giving them the advantage to succeed.

ACADEMIC COUNSELLING

Identification of universities offering high quality programmes aligned to students' goals and aspirations, while inculcating in them the need for mental and academic discipline, and cultivation of a scholarly aptitude.

PASTORAL COUNSELLING

Lecturers are assigned to mentor and monitor students to ensure they are in the best emotional and psychological health to succeed.

ADMISSIONS COUNSELLING

Members of HELP's Pastoral Team are able to give first-hand advice on preparation for interviews and admission to good universities. In the process, the counsellors identify, tease out and nurture inherent characteristics, talents and strengths that students are not aware they possess.

CAREER AND PROFESSION COUNSELLING

HELP offers students avenues for career upgrade, change and diversification through its 13 Master's and two Doctoral programmes at the ELM Graduate School; HELP's industrial and international university partners as well as HELP's alumni, industrial and professional contacts – all of which enables graduates to access and form alliances for business and entrepreneurial success through seminars and dialogues, continuing professional development courses, SME Corp-sponsored programmes, and mentorship by successful business and corporate personalities.
