Ee Ann Ho
Degree: Music

"I chose to study at UCD School of Music as its Bachelor of Music programme is one of the pioneer that specializes in musicology research. The B.Mus prepares the students with solid foundation in the aspects of music history and harmony. As a music teacher, I believe this would benefit me from imparting proper and adequate knowledge to my students to improve their interpreting skills in musical performance. Recruitment by UCD's societies was held during the freshman week and the UCD Philharmonic Choir caught my attention. I went for an audition and now I'm part of the tenor. I look forward to our performance in November as this would be my first performance as part of a choir."
